NOVA SOUTHEASTERN UNIVERSITY'S
COLLEGE OF ENGINEERING AND COMPUTING (CEC)

CELEBRATES OCTOBER'S NATIONAL CYBERECURITY AWARENESS MONTH WITH

CYBERSECURITY DAY AT NSU

OCTOBER 15, 2015

"More and more, Americans are adopting new and innovative technologies and spending more of their time online. Our thirst for computers, smartphones, gadgets and Wi-Fi seems to have no limits. At home, at work and at school, our growing dependence on technology, coupled with increasing cyber threats and risks to our privacy, demands greater security in our online world. Cybersecurity is a shared responsibility. We each have to do our part to keep the Internet safe. When we all take simple steps to be safer online, it makes using the Internet a more secure experience for everyone." (Department of Homeland Security, 2015)

"Some of the greatest assets one can have are strong cybersecurity skills. Without them, anyone can fall prey to fraud, identity theft, social engineering, and cyber crime. One example is with the use of "free" Wi-Fi. Though almost all young adults use smart-phones, most are unaware of the dangers associated with connecting to free Wi-Fi and/or access to unsecured Websites. Once clicking 'yes' to the terms and conditions on an unsecured network at the airport, coffee shop, mall or elsewhere, it becomes possible for cyber criminals to download everything from that smart-phone!" (Dr. Levy, 2015)
